SUMMARY

Second-year Information Technology student at UEH with experience in full-stack web development and Object-Oriented Programming (C#). Seeking an internship role to contribute to real projects and accelerate my goal of becoming a Software Engineer.

EDUCATION

University of Economics Ho Chi Minh City

Bachelor of Information Technology

Aug 2024 - Present

Overall GPA: 3.50

PROJECTS

E-Commerce Website (FPT Shop) | *Live* | *GitHub* | *Demo*

Sep 2026 - Dec 2026

Technologies: PHP 8 (MVC), MySQL, Supabase, APIs (VNPay, PayPal), Docker, Render

- Led a 4-member team to build an MVC e-commerce website.
- Added 4 payment gateways (VNPay, PayPal, VietQR, COD) for checkout.
- Used Cloudinary for images and added real-time XML search.
- Secured the app with Supabase OAuth & Google reCAPTCHA, and sent emails with PHP-Mailer.
- Deployed the app and managed the database with Dockerfile, Render, and Aiven.

Supermarket Sales Management | *GitHub*

Aug 2025 - Nov 2025

Technologies: C# (WinForms), OOP, .NET Framework, SQL Server LocalDB

- Led a 4-member team to engineer a sales management app utilizing strict OOP principles and Design Patterns (Singleton, Composite, Strategy) for scalable architecture.
- Implemented role-based access control (Admin/Cashier) with SQL Server LocalDB and managed robust data persistence via NetDataContractSerializer.
- Developed core system modules (Base, Employee, Login) and customized UI components to enhance user experience.

TECHNICAL STRENGTHS

Languages	C#, PHP 8, Python, JavaScript, HTML5, CSS3
Core Methodologies	OOP, Design Patterns (Singleton, Strategy, Composite), MVC
Frameworks & Libraries	.NET Framework, WinForms, .NET Core, PyMongo, Bootstrap 5
Databases	MySQL, MongoDB, SQL Server
Tools & DevOps	Git/GitHub, Docker, Render, Composer, Postman, Aiven
Cloud & Third-party	Supabase, Cloudinary, Payment APIs (VNPay, PayPal, VietQR), reCAPTCHA

CERTIFICATES

Youth Digital Citizen Challenge (YDCC) Hackathon 2025

Jan 2026

Certificate of Participation | *View Certificate*
